JavaScript

React

Git

Node.js

Express.js

RESTful APIs

HTML5

CSS3

Responsive Web Design

MongoDB

- Built an interactive product filter based on cost which improved user navigation.
- Developed a New Arrivals page utilizing the Fetch API to display the latest skincare products.
- Implemented a Track Order page for efficient order management for users.

MongoDB Kibana Jest

Auto Triage Tool Accessibility

NVDA Glassbox HeadSpin

Design System

## Achievements

### Volunteer (5 years)

#### *Joining The Dots*

Organized and coordinated classical music (flute, violin) and Kuchipudi dance classes for government school students by connecting teachers and students. Managed logistics for seamless class schedules and student-teacher coordination. Led the organization of the Tyagaraja Aradhana event twice, handling planning and execution.

- Created a brand filter on the New Arrivals page to enhance user experience.

Responsive Web Design React

- Collaborated with designers and product managers to develop visually appealing user interfaces for a micro-blogging platform using React.js.
- Implemented high-quality, reusable code for responsive design features, ensuring optimal performance across various devices and browsers.
- Integrated frontend components with server-side APIs, enabling real-time OTP sign-in and live page updates.
- Developed key platform features such as Trending Hashtags, contact page, and various informational pages, enhancing user engagement.
- Conducted thorough testing and debugging to ensure reliability, cross-browser compatibility, and stability of the application.
